BUCU BRYAN JOSHUA

ABOUT ME

I'm a dedicated and adaptable person, always eager to learn and innovate. I enjoy taking on new challenges that require thinking outside the box. I work hard to achieve excellent results, and my problem-solving skills is excellent. With a positive and can-do attitude, I embrace challenges as opportunities for growth. Communication is one of my strengths, enabling me to collaborate effectively with diverse teams. I believe clear communication is crucial for success.

WORK EXPERIENCE

Field Technician Assistant - Work Immersion March 2018 - April 2018

Philippine Long Distance Telephone Company || Baguio, City Philippines

- Assisted customers with their questions and concerns, providing helpful and friendly customer service (Installing Internet).
- Worked alongside technicians to troubleshoot and resolve customer complaints efficiently.
- Gained knowledge about fiber optics and its functioning to better assist customers and address their concerns.

Scribl - Operator August 2022- March 2023

Spector & Co. || 5700 Rue Kieran, Saint-Laurent, QC H4S 2B5, Canada

- Operated a variety of machines to fulfill customer orders efficiently and accurately.
- Conducted quality checks on cover designs for each product in accordance with customer specifications and company standards.
- Collaborated with diverse teams to complete orders, ensuring smooth workflow and timely delivery.
- Adapted to different types of products, utilizing appropriate machinery and techniques for optimal production.
- Demonstrated attention to detail while inspecting cover designs, identifying and rectifying any errors or discrepancies.
- Effectively communicated with supervisors and team leaders and members to address any issues and ensure order fulfillment goals were met.

Internship - Developer February 2023- June 2023

Saint Louis University (Data Protection Office) || Baguio City, Philippines

- Developed Web Services for the Data Protection Office.
- Designed user interfaces (UI) or prototypes for the web services using FIGMA, based on the requirements of the system.
- Implemented the UI prototypes using HTML, CSS, and BOOTSTRAP, resulting in visually appealing and responsive web pages.
- Established database relationships for the web services, organizing and implementing the data needed for the Web Services for the Data Protection Office.
- Created the back-end functionality for the web services using SQL, JavaScript, and PHP, enabling data storage, retrieval, and processing.

SMT - Machine Operator September 2023 - Present

Dormakaba || 105 Blvd. Marcel-Laurin, Montréal, QC H4N 2M3, Canada

- **Setup & Calibration:** Expertly set up and calibrated SMT machines for efficient and precise component placement.
- **Component Placement:** Operated SMT equipment to accurately place electronic components on PCBs, ensuring alignment and quality.
- **Quality Control:** Conducted thorough inspections and in-process quality checks, identifying defects and maintaining high standards.
- **Troubleshooting & Maintenance:** Diagnosed and resolved machine issues, performed routine maintenance, and ensured equipment functionality.
- **Documentation & Reporting:** Maintained detailed records of production runs and communicated discrepancies to supervisors.
